Produktbeschreibung

- The combination of the compact dimensions (only 1,22 m width) and a 90° steering angle promises maximum flexibility
- An electro-hydraulic drive ensures even during long working cycles the necessary power reserves
- The proportional control for all functions of the working platform (driving, lifting, lowering) guarantee precisely and smooth operations
- Via touch of the button the working platform levels thanks to the patented PB support system automatically within a few seconds in an absolute safe position
- Thus the scissor lift is also suitable for inner-city operations on common sidewalks and at tight spaces – and this with a working height of 19,60 m
